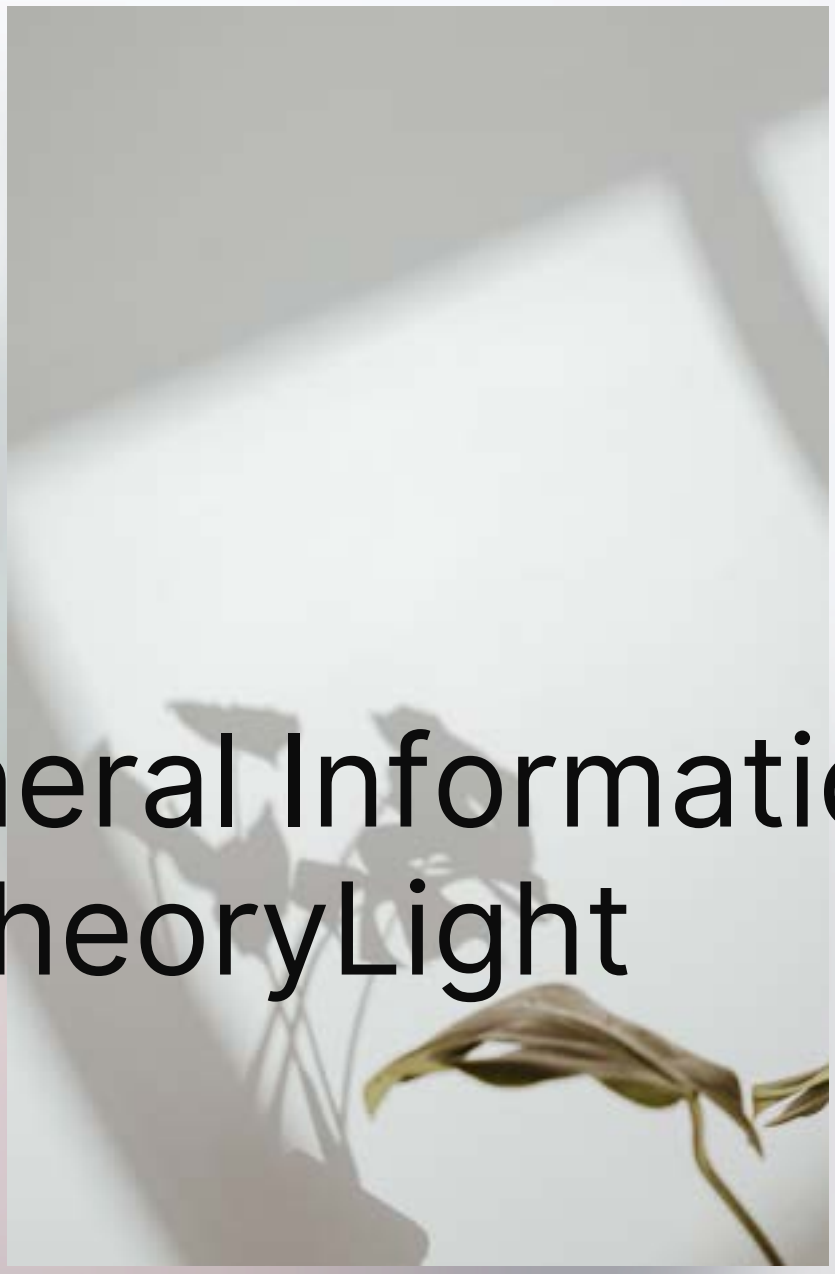
We are Specialized In Wired, Wireless and Hospitality Technologies

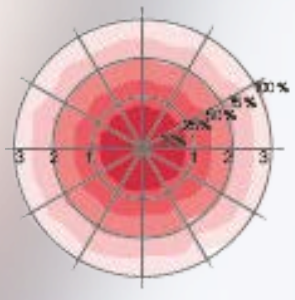
TheoryLight has specialized in wired and wireless lighting control systems for over 12 years team Expertise. Our products, known for their innovative design and high quality, are widely used in commercial lighting, industrial lighting, smart home applications & Hospitality Technologies.

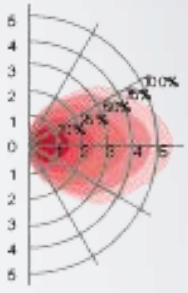


The General Information About TheoryLight

TheoryLight is a market-leading system for innovative lighting control, offering the simplest way to manage lighting via tablet or smartphone. Our platform provides a wide selection of eco-system products, ensuring versatile and eco-friendly lighting solutions.

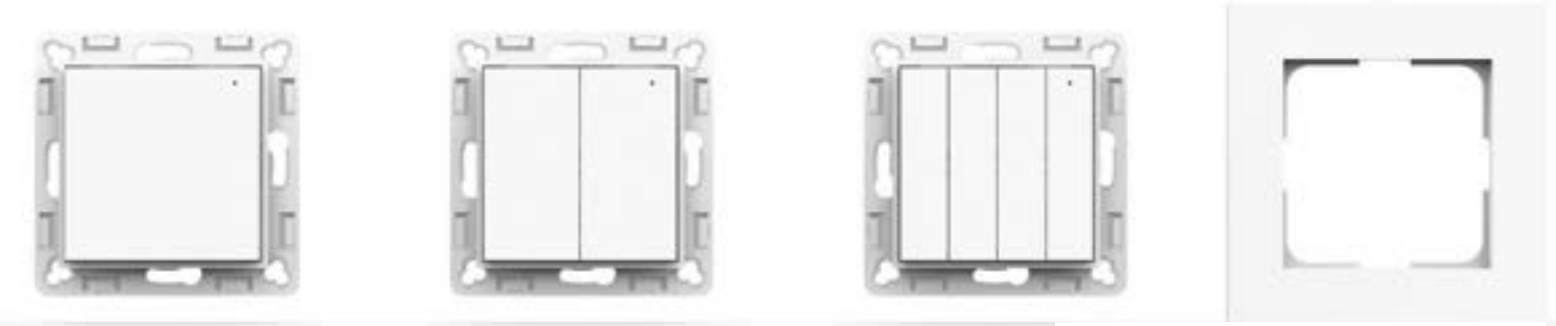
- Prioritizes maximum user comfort
- Offers unparalleled flexibility and scalability
- Enables fast and efficient planning
- Features intuitive and simple operation
- Ensures easy installation with simple corrections
- Provides robust, reliable, and secure performance with continuous over-the-air updates





DALI-2 & Zigbee 3.0 keypad panel

Zigbee 3.0 Wireless ,keypads with 2, 4, 6 Buttons

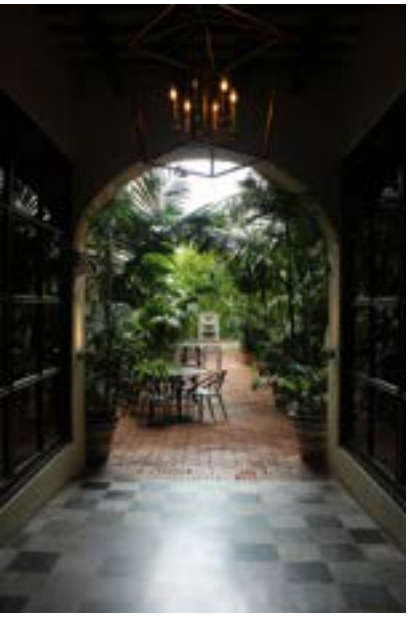


All controls compactly via app and Master Software

- Quick and easy options (group, scenes, animation, gallery, gesture control)
- Professional variants (sensors, extension DALI)
- Push button labels can be printed and customized to clearly indicate their configured functions.
- The new DALI-2 keypad panel features a modern design and improved tactile feedback. It is powered directly via the DALI bus, allowing for easy button function configuration through a DALI-2 controller. Additionally, it supports up to 16 indicator lights, providing intuitive feedback

We Believe in Intellectual
Driven Buissness.....

Presence of The Brand



Expertise

We assist customers in comprehending concepts thoroughly, fostering a deep understanding of our business. Our multi-dimensional expertise allows us to fulfill commitments with exceptional customer satisfaction. With over 12 years of combined experience in Power Quality, Low Voltage ,Automation , and Advance Lighting and Building Control, and Software for Power Quality Simulation, we also possess in-depth knowledge in IoT solutions, Agile software development, and AI algorithms for the Engineering domain. Headquartered in Head Office In Texas and Regional Office in Jammu, Jammu and Kashmit and we have operations in the UAE, Qatar and India.

Wired & Wireless combination

Not only supports Zigbee/Bluetooth dimming; It also supports DALI/0-10V traditional wired dimming

Our roots

We were founded with a commitment to enhancing comfort and reducing energy consumption & Prvide sustainbility and Improve lives . Our inaugural product was a DALI, Zlgbee, DMX & KNX modules designed for smart control. From office buildings and healthcare facilities to educational institutions and commercial properties, all benefit from our powerful combination of sophisticated capabilities and ease of use. With the Theorylight system, everyone can be confident in achieving excellent results quickly and effortlessly.
We elevate lighting control to new levels. More control. More flexibility. More sophistication. More user-friendliness. Our systems are designed for easy selection, installation, monitoring, and use today, with effortless expansion in the future. We believe that lighting controls should adapt seamlessly to your needs, both now and as they evolve.

Technological Solution internationality Proved

We assist you at every stage of your project, from conception to delivery.
Each project is personalized Registered and treated with the utmost confidentiality, ensuring project protection based on prior declaration.

Hotel automation solutions

Guest Benefits....

- Display hotel announcements on touch panels, including welcome messages and promotional offers.
- Enable precise control of room features to enhance well-being and comfort, such as adjusting temperature, lighting, and ambiance settings.
- Provide room access via smartphone, integrating advanced access control systems.
